

28-January-2017

TAGA Harmony Coral F-120 the top floorstanding speaker model in the Coral series tested in a rave review by "MAGAZYN audiostereo" (01-2017).

"The Coral connected to the ECI-5 emerged smooth, saturated and most importantly powerful sounds - well seated on the solid bass foundation.

When it was required by dramaturgy, the volume of the generated scene made you feel like being pushed back to the seat and a wall of sound created in front of the listener seemed to be extremely well-built. It was surprising that the mids and treble, which frankly I feared the most, enchanted me with their refinement and were even approaching to the proverbial creaminess...

Taga Harmony Coral F-120 speaker sounds in a surprisingly even and at the same time engaging way.

They have a "rounded", saturated midrange, an impressive and meaty bass, attractive looks and, in addition, they are perfectly crafted and besides do not cost a fortune..."
