

PLATINUM-18

"The Platinum-18 provides a definitely good (at that price level) sound. Above all, the sound transmission is physiologically clean and natural in its high and medium ranges.

Moreover, as it seems, that well-designed architecture delivers dynamic and extended bass.

It can be described that the overall sound experience is more than well composed and artistically presented.

It is the natural and quite analytical sound which is harmonious and musical. Actually unbelievably good considering the current price...

The ratio of workmanship to sound quality is very good, and tested cables deserve a high score and applause for their reasonably calculated price."
