

16-July-2018

“AUDIO” magazine published a rave review of our HTA-800 hybrid amplifier (07-2018)

Sound

*“...However the HTA-800 sound is saturated with colors of tube amplification which combined with a quite high power gives a truly unique result; **only expensive vacuum tube amplifiers sound in a similar way...** There are no restraints or inconsistencies here. Even the bass is like in the tube amplifier - spacious, soft, warm, avoiding strong impacts, but maintaining good selectivity; the strikes in double bass strings do not merge with each other, the upper range (of bass) sound does not drown in any rumble, the thickness is moderate, although it provides necessary mass ...”*

Summary

Sound

“Full, free and at the same time soft and gentle, even at higher volume levels. The goal was to provide plenty of watts and in addition with a tube-like sound - and it is so.”
