CORAL F-80

"I started by taking a closer look at cabinets and I have to admit that I was positively surprised. TAGA Harmony is on par in this matter with such top brands like Xavian or Castle, what can be considered as a very big achievement...

TAGA Harmony does not leave any illusions that its aim is to create speakers that simply give a lot of pleasure coming out of listening and it succeeded in 100%...

The speakers can be liked for their colorful transmission and emotional approach to music being played as for example listening to the new Depeche Mode CD brought me a lot of satisfaction - sound was full of rich tones, saturated and vivid. This allows to fully enjoy music... Immediately after listening to the first song I had an urge to listen to the next one and another one till with flushed cheeks I reached the end of the disc.

These floorstanding speakers involve the listener thanks to deeply extended bass.. perfectly matched to high and mid frequencies.

Summary: Rich sound in terms of tones with low extended bass. Spaciousness, airy treble and midrange nicely matched with bass.

One of the best crafted TAGA Harmony speakers. They look and sound excellent offering spontaneous, colorful sound glittering with many tones."
