

15-May-2018

A very nice review of TAGA Harmony HTA-25B entry-level hybrid amplifier by Greek “hxos+ soundvision” magazine (04-2018).

“A small, low priced amplifier that covers above and beyond the needs of somebody who wants to start in the HiFi.

*The audition was pleasant and we suggest combining it with speakers which do not put much emphasis on the mids and highs. It is characterized by dynamics and full performance. **When someone wants to get into the Hifi club and their pocket disagrees with that, then the HTA-25B is a great way.**”*
