

14-August-2018

A great review, **and 5 stars for SOUND QUALITY and VALUE FOR MONEY** for TAGA Harmony DA-300 v.3 DAC converter by "Hi-Fi Choice" (08-2018).

MELODICALY AND CULTURALLY

"I liked Taga Harmony DA-300 the most because of its diverse style of playing, in jazz and classical music it was able to show many relationships between these specific genres - jazz turned out to be sonorous, mainly due to the shimmering accent while hitting the drum cymbals or also impressive, almost virtuosic, sound of a lead guitarist Lee Ritenour.

In the classical music there was a momentum in building the sound space, whenever I reached for music based on large symphonic compositions, my listening room filled with music in an impressive way."

SUMMARY

*"Taga Harmony DA-300 v.3 should be considered a very good construction, which **should fully meet the needs of people who want to improve the sound quality of their system.** The advantage of the DA-300 v.3 is also the versatility - this external converter can be used with various systems and devices. In addition, its small size makes that we can find a place for it anywhere."*
