EXCEPTIONAL, HIGHLIGHT (REFERENCE CLASS)

A rave review and the HIGHLIGHT award for the TAGA Harmony Diamond B-60 bookshelf speakers by the "HiFi Test", a German reputable audio magazine (06-2017).

Sound performance

"...Placed on the speaker stands with a distance of more than one meter to the back wall, the **Taga Diamond B-60 makes a powerful impression from the first beat of music. Our first thought: this is an absolutely complete loudspeaker, that has everything and with which the search for the dream loudspeaker can be confidently checked off.** The B-60es play in a light-footed way, with lots of drive and tremendous emotion. They are perfectly matched in the best sense of the word, completely neutral and urging not to turn the music off. The TAGAs can easily extract musical subtleties. No details are concealed, but also not superficially placed on the stage. The timing is very successful, exceptionally harmonious and totally sympathetic. The loudspeaker squeezes low frequencies into the room, when required it rocks like a devil. **The spatial reproduction is excellent, with splendid ability to locate the performers and great illumination of the stage.**"

Conclusion

"TAGA offers compact Diamond B-60 loudspeakers which are excellently crafted, finely designed and with the best technical components. In terms of sound, the speakers represent a great class and given the purchase price that is more than fair, they have earned our HIGHLIGHT award in a honest way."
