

10-April-2018

A great review of TAGA Harmony HTA-25B entry-level hybrid amplifier by French "ON MAG" (04-2018).

Listening: a modest power, but a lot of punch

Conclusion

"...But on reflection, what remains the most important for the nature of a system if it is not a pleasure of listening without limitations, what is offered by this entry-level TAGA Harmony. It will allow to build a small HiFi system more than affordable and especially with plenty of listening joy. For us it is essential."
