

PLATINUM F-120

"... it is unbelievable how deep and plentiful low frequency they have. With abundant details, no matter you want to watch a film or listen to music, they can give you a great satisfaction.

Compared with the Platinum SE series that we listened to last time, the Platinum F-120 has the same brightness, and all the details are very rich...

Realistic sound effects, fast reaction

Happily, the Platinum F-120 is good at replaying jazz music, especially, the brass instrument's realism is of the top class, and the saxophone has not only rich mass, but many details such as blow, buttons and more. The music becomes very hot and draws the listeners into atmosphere it creates.

The real audition result confirms that the Platinum F-120 indeed has the power to be ranked No. 1."
