

28-September-2016

“Stereo i Kolorowo – Underground” on-line magazine just published a fantastic review of TAGA Harmony TAV-616F floorstanders.

In its class, complete revelation.

Listening impressions

*“...So I can honestly say that Taga Harmony represents more than a usual level of price / quality / performance / sound grade ratio. The speakers of this brand do not only characterize with cherished construction, high quality components used for building them, but most of all the healthy and genuine sound far beyond their price levels. As if financial constraints in the case of Taga Harmony would not apply. OKAY. Maybe I am exaggerating a little, but definitely in this case the benefit and added value is on the purchaser's side, not the manufacturer's...
...they offer a solid, well-built, beautifully stretched sound, pretty good dynamics and, significantly, a large space. This is the advanced design - thought out and refined, as usual for Taga Harmony. You can hear the order and harmony, high energy and dynamics, the complement of the sound - its large mass, as well as the high potential of low frequencies, more than well-controlled and varied. In turn, the sopranos are detailed, fast and precise.*

The sound is tangible and present, clear in each frequency. It is malleable, free and expansive and at the same time pleasant in reception because it is elegant and non-tiring. Keeping the optimal balance between the aggression and attack, and the softness and gentleness. The TAV-616F are a balance, proportion and symmetry of communication. Consonance.”

Conclusion

*“The TAV-616F are excellently designed and well-built with outstanding (own production) components. They offer solid, well-engineered sound with the beautiful stretch, pretty good dynamics and, importantly, the extensive space. This advanced design - although budget, is extremely well thought out and refined. **In its class, complete revelation.**”*
