

“wstereo.pl” an on-line magazine published a very rave review of our flagship hybrid amplifier HTA-2500B (08-2019).

The amplifier has a lot of ease in dynamic parts, we can hear that reaching high levels of volume and providing a large scale and powerful sound comes with no effort. TAGA is not scared of any music genre, in this regard the amplifier is universal and giving a lot of pleasure.

The most important is that music still sounds in a very dynamic and fast way, we do not lose the energy of playing, everything is only slightly lighter.

Dynamics is the best in that flagship hybrid amplifier. It is still a warmer sound but not so heated, more neutral and balanced. Air, details, richness of sound and detail presentation – nothing to add.

More information about the TAGA Harmony brand and the products is available at www.TagaHarmony.com
